

Autumn Hills Country Club Wireframes

I didn't receive a lot of feedback around my overall wireframes or design, so everything will mostly stay the same. One thing I did identify through the feedback I received though was that I did not originally build wireframes that showed wireframes in both desktop AND mobile. I went ahead and built mobile wireframes for all of my pages in order to show the page layout on a mobile device. These mobile wireframes are shown in the right while desktop is shown on the left below. There are also 2 stretch feature wireframes I put together; making a dinner reservation and shopping at the online pro shop.
